

## Dedicated Internet Access

**Dedicated access to the Internet with best-in-class performance, reliability and security**

# Dedicated Internet Access

Most businesses live and die with the Internet and can't afford to have an unreliable or underperforming connection. When businesses connect with a shared Internet service they risk congestion, slow speeds, outages, unpredictability and security issues.

With Glo Fiber Business DIA, business partners receive dedicated access to the Internet with best-in-class performance, reliability and security. You'll gain peace of mind knowing you have guaranteed scalable bandwidth with the highest uptime percentage in the industry.

## Why Choose Glo Fiber Business for DIA?

- State-of-the-art fiber network with over 120 years caring for our customers
- Glo Fiber Business DIA is enterprise-grade, scalable, flexible and fast
- Sourced from multiple Tier 1 providers
- Symmetrical service with matching upstream and downstream speeds
- Direct express to peer points available
- Advanced security features like DDoS included
- Our Network Operations Center (NOC) is locally staffed, providing 24/7/365 monitored support
- Our team has decades of experience customizing and building customer solutions that are scalable to fit not only today's needs, but tomorrow's as well
